Bee is currently entering a brand new era in her career and is kicking things off with a Pop Rock/Punk hit. Photo to Burn is a fierce break up anthem that expresses anger towards a previous partner who cheated, lied and disrespected their relationship. Taking influence from artists such as Charlotte Sands, Leah Kate, GAYLE and Olivia Rodrigo, Bee’s new music demands your attention from the get go. With powerful and strong vocals that are instant ear worms, you will find her hard to ignore. This fast tempo head banger is already making a trend on TikTok and has already had a lot of interest and love on socials.

Previously Bee has worked with artists such as **‘Ironik’** and her music has been supported by **official Spotify playlists ‘Fresh Finds’ and ‘Fresh Finds UK’** as well as received support from **BBC Introducing** and multiple local Radio Stations. Bee has also previously been featured on Ear Milk, Clout, Lock Magazine and Celeb Mix to name a few.

Photo to Burn will be released on the 14th July and to promote the release, Bee has been performing in Venues and Festivals, small and large. She will also be announcing a UK Tour at the end of 2023 in the near future to show case her new music.
